Poor Glenn Ford, talk about problems! His wife is being blackmailed, and his friend, the local district attorney, would like to bed her, and is not shy about showing it. Then there's the problem of disposing of the body of the blackmailer, who he's shot, after luring him to his home. Later he discovers he's killed the wrong man! All this very, very frustrating. I particularly enjoyed the scene where Ford's calling a list of acquaintances and asking various women if they'd seen their husbands ... that is, lately? Seeing the relieved look on his face as the reply came back, yes, was pretty funny. But, this is a comedy so all works out fine at the end.
